## Experience

### **Front End Web Developer**

*Oct. 2016 – Apr. 2017*

Affirma Consulting

Bellevue, WA

- Built custom web solutions utilizing front-end best practices, HTML, CSS, and JavaScript.
- Worked with a variety of clients including Microsoft, The Pokémon Company, Kaiser Permanente, and Avista
- As a developer, worked on a team consisting of designers, developers, PMs and QA to deliver web experiences that brought full customer satisfaction
- Researched and presented potential solutions for development along with the building of prototypes
- Actively participated in client meetings to guide project direction and drive customer satisfaction
- Created clear and concise documentation for internal and client use

### **Web Developer**

*Mar. 2014 – Oct. 2016*

Building Information Systems LLC (BuildingI)

Bellevue, WA

- Created and enhanced many custom SharePoint sites across various companies including many internal Microsoft sites
- Worked on a development team, implementing agile practices to build sites in sprints utilizing VSO and Visual Studio source controlled development
- Designed and implemented my own and others mockups while insuring fidelity to the mockups
- Met with various clients to gather and implement feedback into site builds
- Served as Tier 2 support to many sites solving many different problems daily
- Developed documentation pertaining to site builds to insure customer product understanding

### **Freelance Web Developer/Designer**

*Sept. 2012 – Mar. 2014*

RBL Creative Solutions & The Decker Group

Rexburg, ID / Sammamish, WA

- Brought a client manageable web presence to Seattle mountain bike shop The Downhill Zone
- Drove over 100 combined membership, sponsorship, internship, and sports agent requests for the Black Sports Agents Association
- Through standards based development and responsive design, drove sales and promoted businesses
- Built a site selling sunglasses, hats, and t-shirts to fraternities using Drupal Commerce

### **Web Developer**

*Sept. 2012 – Jun. 2013*

Madison School District #321

Rexburg, ID

- Created the school district's first complete mobile web experience using jQuery Mobile on top of Oracle APEX.
- Built into the mobile site a searchable directory, calendar, recent news, and information for parents, students, district employees, and the community
